### Map Scale

### Please Note

The flooded areas shown on this map are estimates for Emergency Evacuation Planning and Execution. Actual flooding heights may vary by +/- 15 feet.

### Definition of Terms

**River Mile** -- The distance along the channel of the Cumberland River upstream from its mouth at the Ohio River.

**Arrival Time** -- Amount of time after an assumed event until water begins to rise at a location.

**Rate of Rise** -- Rate at which water will rise at a location after the arrival time.

**Dam Failure** -- Any condition resulting in the uncontrolled release of water other than over or through a controlled spillway or outlet works.
