- A INTAKE
- 1 SUBMARINE CROSSING

NOTE:  
The prepared channel between Mile 140.3 and Mile 147.5 has a depth of 10' at Maximum Low Water Elevation 353.0.

The prepared channel between Mile 147.5 and Cheatham Lock has a depth of 11' at Maximum Low Water Elevation 353.0.

When Cheatham tailwater reaches elevation 365.0 all navigators are urged to follow the channel line as closely as practicable to prevent bank erosion.
