SUBJECT: Construction of Barge Loading Facility, Tennessee River Mile 18.8, Right Bank

Coffey Construction and Florida Rock Industries will begin construction of a barge loading facility at the subject location on 28 April 2006. Work will be performed during daylight hours. During non-working hours, the floating plant will be moored on-site along the right descending bank. Construction is expected to be completed in spring of 2008.

While this operation will be located outside the normally used sailing lane for this reach, vessel operators are requested to hold a safe distance off the floating plant when transiting this area to reduce the possibility of their vessel wake causing equipment damage or personal injury.

FOR THE DISTRICT ENGINEER:

-original signed-

JEFFREY D. ROSS
Chief, Navigation Branch
Operations Division
