Corps of Engineers Surveys Structures within the Floodplain

NASHVILLE, TENN. (September 29, 2005) - The Corps of Engineers is performing a survey on all structures in the 500-year floodplain of all streams in Knox County. This survey is part of the Knox County Section 202 Flood Damage Reduction Study.

Participation is needed to determine the flood damages that occurred based on a recurrence of the 1977 flood. The work is being performed by a contractor, AMEC. The work will begin immediately and will continue for 4-6 months.

Survey crews will be visiting local homes to determine first floor elevations and will also verify addresses.
