- **Complete Table 1 - Required**

NOTE: If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Section 10 navigable waters list, DO NOT USE THIS FORM TO MAKE THE DETERMINATION. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Section 10 RHA navigability determination.

Identify flowpath to (a)(1)-(a)(3) water or attach map identifying the flowpath; explain any breaks or flow through excluded/non-jurisdictional features, etc.
LRN-2018-00846-EPH-1	Ephemeral	Whites Creek	No	<p>EPH-1 is an ephemeral stream that flows through the center of the review area for approximately 317 linear feet, conveying flow from the features identified as D-2a and D-2b (Figure 2) to an UT to North Fork Ewing Creek, located north of the property boundary.</p> <p>After exiting the review area, EPH-1 continues flowing for approximately 1800 feet downhill, ending at its confluence with an UT to North Fork Ewing Creek (Lat.: 36.25481, Long.: -86.751906).</p> <p>As seen on the current NHD map (Figure 3) North Fork Ewing Creek is a named tributary of Ewing Creek, and Ewing Creek is a named tributary of Whites Creek, which is an (a)(1) water and tributary of the Cumberland River.</p>

				<p>EPH-1 is not identified on USGS Topo Maps (Figures 4-7) or the current NHD map (Figure 3), but during a field investigation on March 21, 2019, flowing water, defined bed and bank, and several OHWM indicators were observed in the channel, including break in slope—sediment sorting—shelving—wracking—and absence of vegetation.</p> <p>Based on a field review and further evidence, EPH-1 is an (a)(5) tributary to Whites Creek and the Cumberland River.</p>

Identify the type of water and how the limits of jurisdiction were established (e.g., wetland, 87 Manual/Regional Supplement); explain how the 100-year floodplain and/or the distance threshold was determined; whether this water extends beyond a threshold; explain if the water is part of a mosaic, etc.

Table 10. Non-Waters/Excluded Waters and Features

Paragraph (b) Excluded Feature/Water Name	Rationale for Paragraph (b) Excluded Feature/Water and Additional Discussion.
LRN-2018-00846-D-2a	During a field investigation on March 21, 2019, indicators of concentrated surface flow were observed within the aquatic feature identified as D-2a; however, this feature lacked a defined bed and bank. Based on a field review and further investigation, D-2a meets the criteria for exclusion per (b)(4)(vi), erosional features, because it lacks the physical characteristics of bed and bank that are required to meet the definition of a tributary per 33 C.F.R 328.3.
LRN-2018-00846-D-2b	During a field investigation on March 21, 2019, indicators of concentrated surface flow were observed within the aquatic feature identified as D-2b; however, this feature lacked a defined bed and bank. Based on a field review and further investigation, D-2b meets the criteria for exclusion per (b)(4)(vi), erosional features, because it lacks the physical characteristics of bed and bank that are required to meet the definition of a tributary per 33 C.F.R 328.3.
